## SUMMARY

Web Developer with a music education and performance background. Confident in both problem-solving and in getting creative for applications with front and back end languages. Enjoys learning new technologies and languages and is able to pick up new skills quickly, recently earned a certificate in Full Stack Web Development from Southern Methodist University.

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript

**Applications:** Node, Express, React, MongoDB, MySQL

## PROJECTS

**ZOOLY** | <https://github.com/israelvarela/ZOOLY> | <https://israelvarela.github.io/ZOOLY/>

- ZOOLY was created for kids to show and teach about different types of animals, species, and information about them. A clean and simple interface using search bar and APIs.
- Responsibilities included mainly front-end focus using the CSS framework Materialize, adding images to the homepage, debugging and connecting to the backend.
- Tools/languages used: HTML, CSS, Materialize, GoogleBooks API, Giphy API.

**MEAL.LY** | [https://github.com/vsteere/Project2\\_VS\\_SS\\_GC\\_AR](https://github.com/vsteere/Project2_VS_SS_GC_AR) | <https://meally-food-delivery-tracker.herokuapp.com/>

- MEAL.LY was envisioned as an application for restaurants to use for their side of the food delivery realm. Geared towards the client's side of tracking their customers, orders placed, status of delivery.
- Responsibilities on this project was back-end focus in connecting and creating routes, approving and editing commits, debugging the application when it came to connecting Handlebars files.
- Tools/languages used: Handlebars/HTML, Node, MySQL, Passport, Express, Sequelize ORM.

**Project Name (TBA) | Link to GitHub | Link to Deployed Project** [always write out link address]

- Short summary of project (1-2 lines)
- Your core responsibilities in project (1-2 lines)
- Tools / languages used
